Summary

Highly motivated Software Development Engineer with a strong foundation in Full-Stack Development, proficient in the Java. Actively enhancing expertise in Data Structures and Algorithms to deliver efficient and innovative solutions. Skilled in leveraging modern technologies to build scalable and robust applications. Looking to apply technical expertise and a problem-solving mindset to a dynamic and growth-oriented organization.

Technical Skills

Languages: Java, C#, JavaScript, SQL

Technologies: HTML, CSS, React,

Database: MySQL, SQL Lite.

Tools: Git, GitHub, VS Code, Postman.

Course Work: Data Structures and Algorithms, Database Management Systems, Object-Oriented Programming, Computer Networks, Operating Systems, and Machine Learning.

Education

G.V. Acharya Institute of Engineering and Technology

August 2021 – May 2025

BE Computer Engineering

CGPA- 8.1

St. Xavier's Jr. College

August 2019 – May 2021

HSC Science(Mumbai)

85%

I.E.S (Indian Education Society)

June 2018 – April 2019

SSC(Mumbai)

78%

Experience

Analyst

July 2025 – March 2026

eClerx

Mumbai

- Worked as an Apprentice to streamline product data processes by maintaining accurate BOMs and documentation, ensuring consistency across systems using Microsoft Excel, SQL, and internal company tools.
- Utilized SQL, Power BI, and Excel to analyze data, create dashboards, and improve reporting accuracy, enabling better decision-making and data visibility.
- Collaborated with cross-functional teams to support engineering changes, enhance product lifecycle management, and deliver actionable insights using company-specific tools and data systems.

Academic Projects

Weather App

- Developed a responsive weather application with **React.js** and **Vite** to display real-time weather information.
- Integrated the **OpenWeatherMap API** to fetch and display temperature, humidity, and wind speed for any city.
- Implemented a responsive user interface with dynamic weather updates and efficient API data handling.
- Worked with **Git** and **GitHub** for version control, testing, and project management.

Employee Management System

- Developed an Employee Management System using **ASP.NET Core Web API**, **Entity Framework Core**, **MySQL**, and **Alpine.js**.
- Implemented **RESTful CRUD operations**, enabling efficient employee record management with seamless database integration.
- Deployed the application on **MonsterASP.NET**, providing live access and demonstrating full-stack web development skills.

Financial Literacy And Market Forum

- Developed a financial education web application using **HTML**, **CSS**, and **JavaScript**, **Bootstrap**, **Spring Boot**, **MySQL**.
- Designed and implemented multiple pages such as credit management, savings, budgeting, and investments.
- Integrated financial resources and tools for users to learn about personal finance.
- Applied responsive design principles to ensure a seamless user experience across devices.
- Managed project structure and assets, optimizing images and content for performance.

Achievements & Interest

- Completed an extensive **Java with DSA certification** program from Apna College, gaining in-depth knowledge of core Java concepts, including object-oriented programming, multithreading, exception handling, and file I/O. Developed a strong foundation in **Data Structures and Algorithms**, mastering topics such as arrays, linked lists, stacks, queues, trees, graphs, and sorting techniques.
- Skill of the Year 2025 on Generative AI** (TUM & eClerx) : Completed training in prompt engineering for LLMs , data analysis , and building applications on foundational models.
- Passionate about **cricket** and **chess**, showcasing teamwork, strategy, and analytical thinking.
